5:30 pm in the Boardroom

2006/2007 Citizens' Oversight Committee Annual Report

The Annual Report has been completed and released to the public. This document contains information to demonstrate financial compliance on the part of the Measure L Bond Program and outlines current program happenings. To access the Annual Report please visit the Bond website at <http://www.bond.deltacollege.edu>.

A Familiar Sight

Over the coming months, the scene shown above will become a more familiar sight around Delta College's campus. The picture above is of the upgrades currently underway on the Lawrence A. DeRicco Football Stadium and the Softball Complex. Up next will be groundbreaking for the new Student Services Building. The area has been fenced off and clearing has started in anticipation of construction. To celebrate this exciting time the college will be hosting a groundbreaking ceremony on Tuesday, May 6. The ceremony will begin at 4:30pm and will feature speakers, the traditional shovel ceremony, and hors d'oeuvres will be served.

Student Services Building

The San Joaquin Delta College Student Services Building, consisting of two stories and 50,000 square feet, will consolidate various student services that are currently scattered throughout the campus in an effort to provide a more efficient and technologically advanced delivery of student services throughout the District. Departments located in the new building will include Admissions and Records, Financial Aid, Counseling, and Disabled Students Program Services.

Other Upcoming Projects

Goleman Learning Resource Center

The renovation of the Goleman Learning Resource Center (LRC) will create a technologically advanced information center, with aesthetics and design that will create an atmosphere conducive to study and ease of modern information retrieval in a safe environment for the entire campus community. The renovation will create a state-of-the-art library in a 50,000 square foot, two-story setting with contemporary amenities. These include individual and group study areas and universal internet access. Library functions such as reference and cataloging will also be redesigned and modernized.

Data Center

The District Support Services Center will begin with the construction of a new Data Center which will provide the technology backbone for the entire District. By consolidating Information Services, Information Technology and Audio Visual into one facility it is expected that delivery of technology service will be improved and capacity will be expanded to meet future needs of the District.

The project images shown are conceptual renderings. Please visit the Measure L Bond website at www.bond.deltacollege.edu for updates.
