

San Joaquin Delta College

MATH & SCIENCE CENTER

Conceptual Rendering - South-East

Conceptual Rendering - North-West

The proposed new 100,000 square foot three story Math & Science center would replace the Cunningham building in an effort to provide up to date laboratories with expanded curriculum in both mathematics and science. In addition to laboratories the proposed center would include classrooms and lecture halls and would be highlighted by an enclosed center atrium. The Math & Science Center is funded by both the Measure L Bond and matching State funds.
